## 1. What is a cookie?

A cookie is a small text file that is downloaded onto 'terminal equipment' (e.g., a computer or smartphone) when the user accesses a website. It allows the website to recognise that user's device and store some information about the user's preferences or past actions.

## 2. Why do we use cookies?

We use cookies to make our website run properly as well as to provide relevant advertising. We also use cookies for statistical purposes to analyse how our website is being used by visitors.

## 3. What cookies do we use?

We use 2 types of cookies on our website. These are HTTP cookies and pixel cookies.

HTTP cookies are cookies that are sent from a server to your web browser. They then are used to tell when you have accessed the same site again which allows you to stay logged in.

Pixel cookies are tags of code that are put into a website to allow the company to measure the effectiveness of their advertising.

The cookies we use have been arranged based on whether they are necessary, for statistical purposes or for marketing purposes. Each of these categories with the relevant cookies are found in sections 4, 5, 6 and 7, below.

## 4. Necessary cookies

These cookies are used to ensure our website is useable by providing basic functions like page navigation.

The following table provides detail of the necessary cookies we use, each of their purposes, their type, who provides them and how long we hold the data for.
